- Streamlines & Systematize Operations
- Easy & very fast Customization using Agile Tools
- Timely Delivery
- Improved Product Attributes
- Ease in getting trained Manpower
- Min. Customization Cost involved

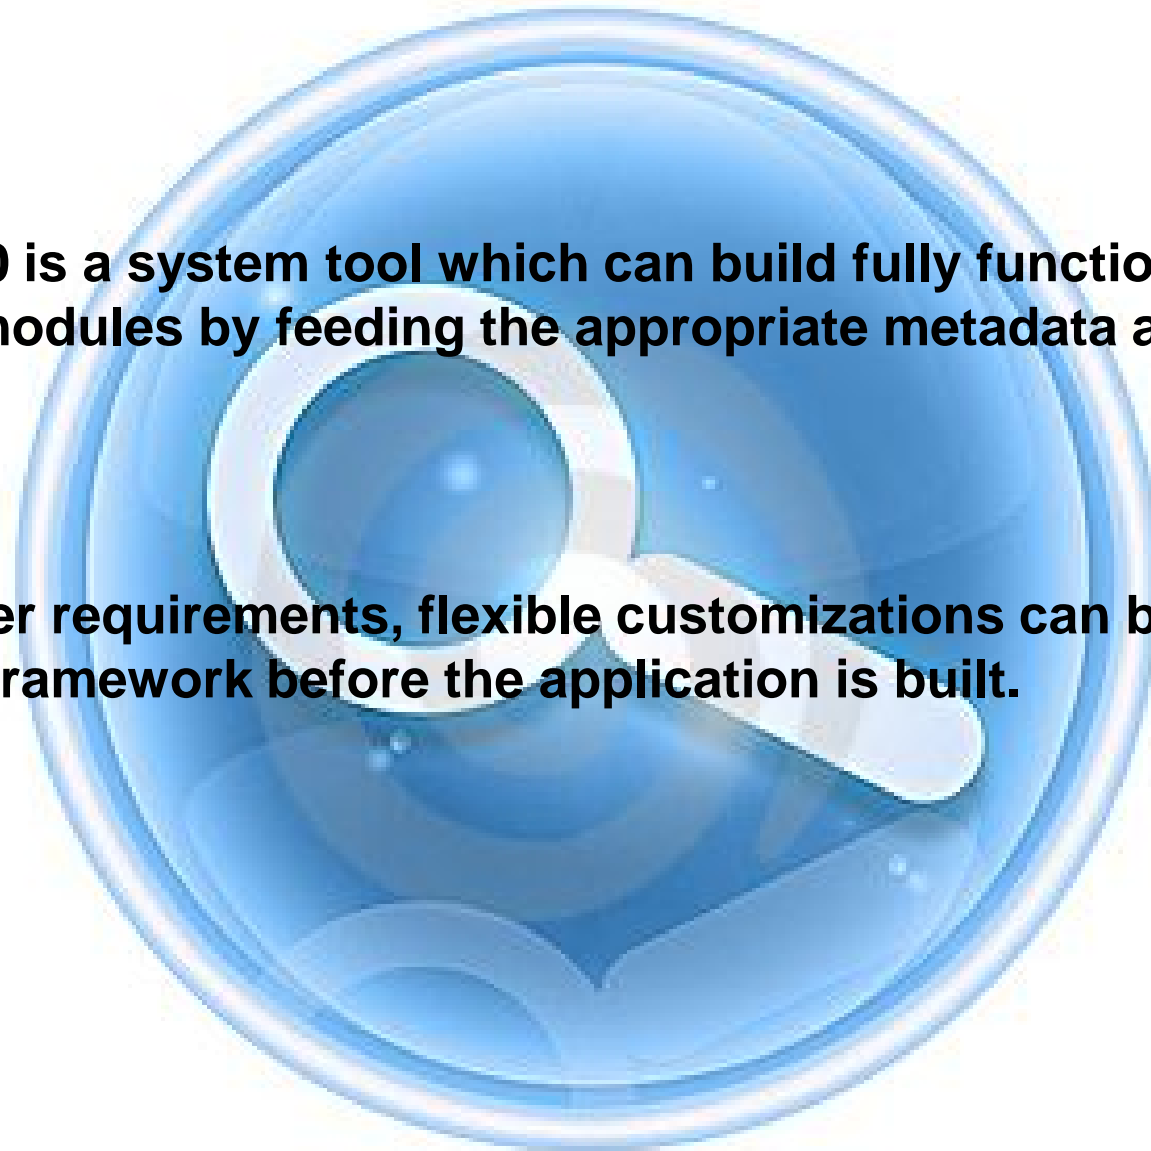

Agilewiz™ 2.0 Snapshot

All about Agilewiz™2.0

- **Agilewiz™2.0 is a system tool which can build fully functional application modules by feeding the appropriate metadata as input.**
- **Based on user requirements, flexible customizations can be made to the framework before the application is built.**

Agilewiz™ 2.0 – Our PaaS

There are many Rapid Application Development (RAD) and Business Process Management Suite (BPMS) tools available in the market, so how is Agilewiz™ 2.0 different??

Most BPMS and RAD Tools available in the market have the business rules part missing, they just have plain creation, reading, update, delete (CRUD). This is where we are radically different.

iWeb Device
